Collecte des données statistiques scolaires dans les établissements scolaires du primaire et du préscolaire pour le Projet Carte Scolaire

CONTEXTE ET JUSTIFICATION:

Tous les pays cherchent, à des degrés divers, à évaluer dans quelle mesure leurs systèmes éducatifs répondent bien aux besoins identifiés. Une telle connaissance aide les gestionnaires de l'éducation à mesurer la progression vers des objectifs internationaux précis tels que l'achèvement du cycle primaire pour tous en 2015, à évaluer les décalages entre différents groupes (ruraux/ urbains, hommes/femmes, ou disparités géographiques), à pratiquer des comparaisons internationales ou à exprimer des objectifs en termes quantitatifs.

Le système éducatif camerounais dans son ensemble n'échappe pas à cette volonté politique transcrite dans le Document de Stratégie pour la Croissance et l'Emploi (DSCE) de rationaliser la dépense publique et de s'orienter vers un pilotage axé sur les résultats. Dans l'optique d'une gestion efficace dans le secteur de l'éducation, il est nécessaire de mettre à la disposition des décideurs, des dirigeants d'établissements, et aux communautés locales, des informations pertinentes pouvant leur permettre de mieux gérer, de planifier et d'assurer la qualité du système éducatif. L'établissement d'une carte scolaire du MINEDUB qui permet d'éviter une distribution aléatoire des ressources éducatives sur le territoire national pouvant déboucher d'une part sur des conditions inégales d'enseignement et d'accès à l'éducation et d'autre part, sur de nombreuses disparités (disparités entre les régions, disparités genre, ...) constatées dans le développement de l'éducation.

En ce moment, où le secteur bénéficie des financements extérieurs et où des nouvelles politiques et réformes sont entreprises, la production régulière des données statistiques s'inscrit dans le cadre des engagements pris par le Gouvernement pour le suivi partenarial de la mise en œuvre de la stratégie sectorielle qui vise entre autres, l'achèvement du cycle primaire pour tous les enfants de la classe d'âges à l'horizon 2015.
