

2023 CAMEROON ROUTINE VACCINATION COVERAGE SURVEY (ECVRC-2023)

HEALTH FACILITY AND COMMUNITY HEALTH WORKER QUESTIONNAIRE

Hello, my name is _____ and I work for the National Institute of Statistics. In collaboration with the Ministry of Public Health, we are carrying out a child vaccination survey on a sample of randomly selected households across the country. After an interview in the household of Mr/Mrs (name of household head), it appears that the vaccines of her child (Name of the Child) are followed up in your health facility/the vaccination booklet of (Name of the child) is kept by the community health worker. Not having been able to obtain all the information concerning his vaccination during this interview, the methodology of the survey previews to complete the information from the registers of the health facility/the community health worker in case it is the latter that keeps the notebook/booklet of the child. We ask for your permission and assistance for this. Do you agree?

SECTION 00 : CHILD'S INFORMATION

F0Q1 EA serial number: _____	□□□□
F0Q2 Selected household number inside the EA: _____	□□□□
F0Q3 Name and line number of the child _____	□□
