PRESENTATION OF NOMENCLATURES

Various nomenclatures have been elaborated mainly in order to facilitate the organization of the data collection. Their aim for this survey is essentially to enable to give a good description of the household consumption and the labour market in Cameroon.

The present document includes the nomenclature of administrative units, employments, professions and trades, economic activities, products of final consumption of households, trainings and survey areas. Each of these nomenclatures concerns specific sections of the questionnaire and one or several questions in those sections

The **nomenclature of administrative units** concerns:

- **SECTION 00** about « General information » and questions **Q1, Q6 and Q7**;
- **SECTION 08** about « Migration and residential mobility of the household » and questions **Q5 and Q22**;
- **The nomenclature of employments, professions and trades** concerns **SECTION 04** « Economic activity and income of household members », notably question **Q10**;
- **The nomenclature of economic activity** concerns **SECTION 04** « Economic activities and income of household members » and question **Q11**;
- **The nomenclature of products of consumption** concerns **SECTION 13** on « Retrospective expenses and acquisition of the household » question **Q2** and **SECTION 14** on « Daily expenses and acquisition of the household » at question **Q5**;
- **The nomenclature of training** concerns **SECTION 03** on the « Education and training of household members », notably questions **Q25** and **Q27**;
- **The nomenclature of survey areas** concerns **SECTION 00** on « General information » and questions **Q2 and Q3**.

It is important to carefully read the usage note that precedes some of these nomenclatures in order to master the little subtleties that are indispensable for the good coding of target variables.

NOMENCLATURE OF ADMINISTRATIVES UNITS

This nomenclature provides the region code (question Q1 of section 00), the division code (question S6 of section 00 and questions Q5 and Q22 of section 07) and the subdivision code (question Q7 of section 00). Moreover, you can use it to code question 10 of section 01. See the nomenclature of survey areas at the end of this document in order to code questions Q1, Q6, and Q7 of section 00.

NOMENCLATURE OF EMPLOYMENTS, PROFESSIONS AND TRADES

This nomenclature concerns **SECTION 04** on « Economic activity and income of household members» and the codification of question **Q10** « *What is the name of the post, the task of the main employment that (Name) exercised during the last 7 days or that he/she usually exercises? ».*

This nomenclature picks up what the individual does in his/her employment: his/her task or function. These notions must not be mistaken with the training of the individual.

Example: A senior technician of telecommunication who carries out commercial activities is coded as a trader and not as a technician.

It is important to make the difference between the levels of training and the functions in the enterprise. An electrician technician in the enterprise is the one occupying that function in the enterprise. Take note here that he may not have the diploma of an electrician technician.

NOMENCLATURE OF ECONOMIC ACTIVITIES

This nomenclature concerns **SECTION 04** «Economic activity and income of household members » and the codification of question **Q11** « *What is the activity of the enterprise where (Name) exercises his/her employment or which type of product does it produce ?* ».

I. Presentation of the nomenclature

The term activity characterises **what a production unit or an enterprise does**. It is different from the notion of employment, which characterises what the individual is doing: his trade, his task, his function, etc. For example, an individual who works in the Brasseries du Cameroun and goes for distribution of beer, is a driver by profession; **code 6605** in the nomenclature of employments. The activity of the enterprise where he works is “Manufacturing of beer and malt” **code 131** in the nomenclature of activities.

In order to better codify the activity, you must describe precisely what the production unit does and the main products and / or services born from this activity.

This nomenclature is divided into 4 big posts and is coded on 3 positions.

1.The activities of the primary sector

This group is made up of activities that consist in exploiting natural, vegetable, or animal resources. These activities are agriculture, breeding and hunting, forest exploitation and sylviculture. Their codes start from **011** to **042**.

Particular case

Tapping palm wine is considered as an activity of transformation, it's coded in “Manufacturing of other alcoholic drinks.” (**Code132**).

2. The activities of industries:

They are extraction, transformation of raw material into finished material, production and distribution of electricity, gas and water, and building works. Their codes go from **050** to **312**.

3. Commerce

This group corresponds to the purchase/sale in the state i.e. without transformation of goods. It includes motorcycles and car trade, accessories and fuel trade, wholesale trade, retail trade, and the activities of intermediaries of trade. It corresponds to codes **321** to **325**.

The post entitled “Other wholesale trade” (**code 324**) equally includes the intermediaries of wholesale trade. The same thing is applied to “Retail trade of other products” (**code 325**) which includes the intermediaries of the retail trade.

Particular case: The retail sale of meat, without transformation, is a trade activity: “retail trade of other **foodstuffs**” (code 325). If on the contrary, the individual is a butcher who buys live animals, kills and cuts into pieces to sell either in retail or whole sale, the activity of the production unit is industrial;” production, transformation and conservation of meat made products ”(**code 071**).

4. The activities of service

They are activities of catering, transport, telecommunication, financial and insurance activities, services to enterprises, public administration activities, education, health, associative activities, personal services, etc. This item corresponds to codes **331** to **340**.

II. Remarks on the usage of the nomenclature

The risks of confusion are high between the different sectors of activities as seen in the example below.

1. Distinction between the primary sector or industry and trade

The primary sector activities or industrial sector activities should not be mistaken with trade when the products are sold by the producer himself.

A person who rears and who sells his cows in the market is not trading. His activity is of the primary sector: "Cattle rearing" (**code 021**). It is the same thing for the female farmer who sells plantains that she produces. The activity here is "bananas and tubers farming", (**code 013**).

The woman who produces fritters and who sells them herself, is by so doing, working in an enterprise of production "Bakery, pastry making, biscuit factory", (**code 111**) and not in a trade enterprise.

The lady who sells cassava sticks (*miondo, mintumba*) is by so doing working in a production unit of trade, if she buys cassava in bags in order to retail it in the market (**code 325**). If she buys cassava or cultivates or farms it, then makes "cassava sticks (*miondo, mintumba*)" and retails them in the market, she is by so doing working in an industrial production unit: "Cassava processing" (**code 083**).

2. Distinction between services and trade

The production unit of the woman who roasts fish or the one who sells fritters, beans and pulp has a "catering" activity (**code 332**) and not a trade activity. Likewise, an owner of a takeaway bar who has some few chairs where customers often seat to drink has an activity of catering "restaurants and bars" (**code 332**) and not of trade.

3. Distinction between services and industry

An own-account seamstress is carrying out an industrial activity if her turnover is mainly found in the making of dress "Making of clothing articles" (**code 155**).

If on the contrary, she mainly mends one or many second hand dresses, it is therefore an activity of service: "Other repairs of personal goods" (**code 423**).

The shoemaker works in an industrial production unit, if the main activity consists in the making of shoes "Manufacturing of shoes" (**code 162**). If on the contrary, he mainly mends shoes, it is an activity of service "Other repairs of personal goods" (**code 423**).

4. Other remarks

Works related to plumbing repairs, are put under "Installation and finishing work" (**code 312**).

- Ministries, delegations and local collectivities are classified in item "Activities of general public administration and services given to the whole collectivity" (**code 391**). The Funds for Stabilisation of Hydrocarbon products (CSPH) and the Cameroon Sinking Funds (CAA), the Central Bureau for Census and Population Studies (BUCREP) and the National Institute of Statistics (NIS) are classified in this group.
- Services for education (primary schools, high schools, secondary schools, etc.) whether private or public are classified in item "Education" (Code **400**). The supervising ministry, for example the Ministry of Basic Education or that of secondary education are in code **391**
- Health Services (health centres, dispensaries, consulting room, lab for analysis, etc) are coded in item "Activities for human health" (**code 411**) whereas the Ministry of Public Health is classified in **code 391**.
- Public enterprises are classified according to their main activities, consequently:
 - o The CRTV is in « Artistic, recreative, cultural and sport activities » (code 424).
 - o The SCDP (Société Camerounaise des Dépôts Pétroliers) is in « Annex and auxiliary activities of transports » (**code 346**).
 - o CNPS (National and Social Insurance Funds) is in « Obligatory social security» (**code 392**).
- For people working for a household as a house servant (driver, cook, watchman, etc) the activity of the enterprise is "Domestic services" (**code 425**).

There is an unclear limit between what one can or cannot describe as transformation. In these cases, see your supervisor where there's any doubt.

NOMENCLATURE OF ACTIVITIES AND PRODUCTS

This nomenclature concerns **SECTION 04** « Economic activity and income of household members ». It makes easy the identification of some branches of activity from products or services offered by the enterprise (**question Q11**). It includes 44 big groups of products which are presented in the table below.

22.	Other non metallic mineral products and material for construction	53	44.	Territorial correction	70

Each of these groups includes the sub-groups including post of products. Each product has a 4 digit code among which the first three determine the sub-group, and the fourth represents the serial number of the product in the sub-group.

The nomenclature does not bring out all the products that can be found in enterprises or unit of production. This is impossible. When the interviewer is faced with the codification of a product which is not cited in the nomenclature, two cases can arise:

- a) In the nomenclature there is a good (or service) which is very close to that which is observed. It will then be codified in the same manner. So an item like "female cow meat" wasn't provided

before, but it is clear that the purchase of female cow meat must be codified in the same manner as "Cow or calf meat with or without bone".

b) For some headings, no line comprising "Others...., nde" will be found.

In other not to forget, the interviewer must codify the products in the evening, or latest, the next day of the interview, away from the respondent's residence in order not to waste their time.

Remarks on the usage of the nomenclature

The interviewer will have to avoid all confusion during the codification of products. For example, *the loincloth material and the loincloth garment*

The untransformed loincloth material is coded **1531** « *the cotton cloth or jersey* » or **1532** « *Clothes and jersey of other textiles* ». Whereas the loincloth transformed into a dress is coded **1551** « *Textile dress* » (*Men over garment*), (*women over garment*), (*children clothing*).

Attention: The call box service (calls, transfers of airtime, **sale of prepaid cards**, etc.) is coded **3540** « service of telecommunications (including call box) ».

NOMENCLATURE OF PRODUCTS FOR CONSUMPTION

This nomenclature concern questions **Q2** of **SECTION 13** «Retrospective expenses and acquisitions of the household » and **Q5** of **SECTION 14** «Daily expenses and acquisitions of the household ».

I. Presentation of the nomenclature

The nomenclature is divided into 13 functions, among which the first 12 concern the household final consumption.

Function		Page
1	Food and soft drinks	73
2	Alcoholic drinks, tobacco and narcotic	80
3	Articles of clothing and footwear	80
4	Housing, Water, Electricity, Gas and other fuels	83
5	Furniture, household articles and current maintenance	84
6	Health	87
7	Transports	89
8	Communications	91
9	Leisure and culture	92
10	Education	96
11	Hotels and Restaurants	97
12	Properties and various services	98
14	Investment in the housing	101

Each function is structured in groups, sub-groups, post, variety and code of the product. Each product has a 7 digit code: the first two determine the function of the expenditure (01, 02,... , 12 and 14), the third is the expenditure group, the fourth is the sub-group, the fifth is the post and the last two are the code of the variety.

The nomenclature does not quote all goods and services that can be subject of expenditure/acquisition. That would be impossible. When the interviewer faces an expenditure which is not quoted in the nomenclature, two cases can arise:

- a) There is a good (or service) which is very close to that which is observed. It will therefore be codified in the same manner. So, an item like "Female cow meat" wasn't provided before, but it is clear that the purchase of female cow meat must be codified in the same manner as «Cow or calf meat with or without bone".
- b) If there are no goods or service close enough, the expenditure/acquisition will be codified as "Other xxxx n.d.e" under the same heading.

Remarks: For some headings, no line comprising "Others....., nde" will be found.

In other not to forget, the interviewer must codify the expenditures/acquisitions in the evening, or latest, the next day of the interview, away from the respondents' residence in order not to waste their time.

II. Remarks on the usage of the nomenclature

The loincloth material and loincloth garment (Function 3)

An untransformed loincloth material is classified in the sub group 0311 "material for clothing" code **0311001** "cotton material (loincloth, velvet, etc)". Whereas the loincloth transformed into **garment or dress** is classified either in item **03121** "Men's clothing (over garments)", "**03123**" "women over garment" or **03125** "Children's clothing".

House maintenance and household investments (function 4 and 14)

Group 043 “Maintenance and household repairs” of function 4 corresponds to little repairs in the lodging, whereas function 14 concerns the investments of the household.

Investment includes building works or lodging repairs, connection to water or light networks, installation of cable, etc. Take note that the renewal of the lodging paint corresponds to an investment and not to little repairs.

The two functions contain similar products, for example cement or sand. But these products will be coded differently depending on their usage. For instance, a carton of tiles used to arrange the floor is classified in **function 4, code 0431007**. On the contrary, if the tiles of the parlour have to be replaced completely, or if some tiles have been bought for the finishing work of a house, they are registered in **function 14, code 1402004**.

Restaurant expenses (function 11)

The level of codification of these expenses depends on the type of products consumed and not on the place of consumption. When it is possible to evaluate the cost of the products that makes up a meal, they are registered separately. For example, if the interviewee has acquired a dish of roasted fish with 2 cassava sticks you register separately the roasted fish (**code 1111202**) and the cassava sticks/miondo/mintumba (**code 0117511**). The same thing is applied to sandwiched or charged bread: register *bread* (**code 0111402**) and *chocolate* (**code 0118206**), *sardine* (tinned fish) **code (0113501)**, etc. If the interviewee has acquired a dish of *rice-sauce and meat*, it is not therefore possible to separately evaluate the different components, in such case, the dish is coded in **1111209** “Other dishes taken outside”.

Transfers

Transfers are treated according to the different types:(i) money transfer, (ii) transfer in kind but non food, (iii) food transfer.

Money transfer: It concerns only transfers from the household to persons not living in the household regardless of their relationship with the household. These types of transfers are classified in function 12, item **12704** “Gift or present in a money form”.

Transfer in kind but not food received by the household are identified in section 14. They are classified according to the nature of the products given. For example, a cousin living abroad has given a mobile cell phone to the household, it will be coded in **0820002** “Cell phone or mobile phone” of function 8 “Equipment for telephony and fax”.

Food transfers received by the household are identified in section 13.13 related to stocks and in section 14. In both cases these transfers are classified in function 1 according to the type of product received.

The choice of the code in the case of global expenditure or in case where detail about the expenditure is omitted.

It can happen that some households do not give details about their expenses, it is the case in the domain of Health, of maintenance work done, etc. In such a case you should insert the totality of the expense to the item that represents the best the nature of the expense or its finality. For example, if the interviewee is unable to separate the hospital expenses from the cares expenses, the total amount of the expenses will be coded under Hospitalization. As concerning vaccination expenses, if the additional expenditures like syringe, injection charges cannot be estimated separately, the total expenditure is under vaccines (**code 06113**). In the case of maintenance work of the lodging, if the interviewee cannot dissociate the workmanship fees from that of the raw material, the sum of expenses is registered under the item “**labour for maintenance**” (**code 0432002**).

NOMENCLATURE OF TRAINING

This nomenclature concerns **SECTION 03** «Education of household members». It enables to codify questions **Q25** and **Q28**.

It includes two information, notably the domain of training undergone (Education, letters and art, social sciences, journalism and information, commerce, administration and law, natural sciences, mathematics and statistics, etc.) and the level reached (on-the-job training, training in a training centre, primary and post primary school training, first cycle secondary training, post secondary or higher training or similar to A level +1/2, etc.). The limits between some levels of training are often difficult to identify. It is the case between the « on-the-job training» and « without training »

On-the-job training: It is learning in the enterprise; that is to say a structure in which training is not the priority. This training is different from « absence of training» by the fact that the person receiving it is conscious about it. For example, a young female caterer who learnt how to cook from her mother in the house in her domestic chores will not say that this learning is an on-the-job training. In the framework of this survey this training is not a training.

Training in a training centre: this refers to an apprenticeship that has taken place in a structure that effectively trains without issuing an official diploma (diploma of technician, HND, Engineer, etc.); this training can nevertheless be ended by an attestation.

For example, an individual who has undergone a training in office automation in a training centre of the quarter will bear the code **0611"Use of a computer and office automation"** so far as the *training* is concerned and **"2"** for the *level of training*. If on the contrary, that individual has learnt WORD and EXCEL from a private individual, the corresponding code is **0611" Use of a computer and office automation"** and **1** for the *level of training*.

Schools of the primary, secondary first cycle, secondary second cycle, higher first cycle, higher second cycle are trainings that end respectively with a diploma of the primary level, secondary first cycle, secondary second cycle, higher first cycle, higher second cycle, etc.

Table : Nomenclature of levels of training

This nomenclature concerns **SECTION 15 « Time use »** and the codification of questions **Q103 and Q110**.

The method of survey adopted is therefore the interview about what the person has done over 24 hours the preceding day with the recording of activities in group of thirty minutes.

At the end of the interview, one must be able to unfold the day of the person interviewed, in groups of thirty minutes. This agenda must be considered as the product of the end of the interview.

During the interview, one must try to bring the person to remember what he was doing during each hour, to write down what he says, (example: looking for firewood: the travel time to the site, the collection (which can be linked to the research, the journey back).

For example, if the person talks about farm work just after the breakfast, it is convenient to look at the time used to move.

Activities could be linked to the specific context – for example rearer area, harvest period, - and for categories of persons, according to the sex, the age, the school and professional status, etc.

The survey produces statistical data on all activities that the population carries out during one day. The ICATUS nomenclature (International Classification of Activities for Time Use Statistics) enables to distinguish activities defined as being in the productive non productive scope. The productive scope is divided in two groups called economic and non-economic (non remunerated services for one's household, other households or the community as a whole). This nomenclature has 9 big groups, sub-groups and groups). The big divisions are:

1. Emploi et activités connexes
2. Production de biens pour usage final propre
3. Services domestiques non rémunérés pour les membres du ménage et de la famille
4. Services de soins non rémunérés pour les membres du ménage et de la famille
5. Bénévole non rémunéré, stagiaire et autre travail non rémunéré
6. Apprentissage
7. Socialisation et communication, participation communautaire et pratique religieuse
8. Culture, loisirs, médias et pratiques sportives
9. Soins personnels et entretien

1. Employment and related activities
2. Production of goods for own final use
3. Unpaid domestic services for household and family members
4. Unpaid care services for household and family members
5. Unpaid volunteer, trainee and other unpaid work
6. Learning
7. Socialization and communication, community participation and religious practice
8. Culture, leisure, mass-media and sports practices
9. Self-care and maintenance
